Dr.coffee

Castle Commercial Automatic Coffee Machine

Elegance in Form Technology in Heart

New Heights of Aesthetics

One-Click Golden Circle

More Efficient Production

Smarter and More Worry-Free

Dr.coffee Castle

Castle is a high-performance fully automatic coffee machine designed for coffee business venues. It features an artistic retro appearance design that complements the operating environment of cafes. With the use of leading technology, it not only solves the coffee quality control of stores but also greatly helps operators reduce the cost of personnel management in stores.

New Heights of Aesthetics

Breaking the conventional design of fully automatic coffee machines, Castle introduces classical elements for the first time, making the appearance of the coffee machine more gentle and smooth, better integrating into the operating scene of boutique cafes. It is equipped with a lighting design at the back, providing consumers with visual enjoyment, and enhancing the overall beauty of the bar counter.

One-Click Golden Circle

Equipped with a steam boiler and a professional magnetic drive milk pump, supporting hot and cold milk cap drinks, adding cold milk drink options, adjustable milk foam hardness, creating a golden circle in the coffee cup. In addition, Castle is compatible with 21g or 28g brewing units, automatically adjusting the powder pressure extraction force, allowing users to choose the richness of taste freely, mastering a more perfect production quality.

More Efficient Production

A dual grinding system, with two grinding components working simultaneously to double the grinding efficiency, dual boiler configuration, steam boiler and hot water boiler independently set, making coffee production more efficient. Castle is also equipped with a professional rotary pump, effectively improving the speed and stability of coffee production.

Smarter and More Worry-Free

Automatic steam wand frothing makes frothing milk foam simpler, with a 3L steam boiler that enhances steam stability. Intelligent grinding calibration, real-time calibration based on changes in coffee extraction and flow rate, no manual intervention required, ensuring the production quality of each cup of coffee.

Feature

Independent hot water outlet	●
Automatic steam wand frothing	●
Simultaneous coffee and milk dispensing	●
Pressurized automatic water inlet	●
Intelligent fully automatic cleaning	●
Internet of things mobile payment	○

Technical sheet

Bean hopper capacity (g)	700*2 / 700*2+500*1
Powder box capacity (g)	1000*2
Waste residue box capacity (g)	500
Screen size (round)	10.1″
Rated voltage (V)	380
Rated frequency (Hz)	50/60
Rated power (W)	5600
Machine weight (Kg)	60
Machine D*W*H（Cm）	61*55*54.5

Capacity

Advised daily output（cups）	200
